While the market turbulence that we are currently experiencing can be difficult to watch, history has shown that investing in a long-term retirement plan throughout our careers gives us the best opportunity to weather all types of market conditions. Consistent contributions over time allow us to purchase more shares of a mutual fund when the share price is low and a long-term investing approach enables us to take advantage of the market's best days and worst days. If you would like to discuss your Plan account and/or your current asset allocation, please reach out to T. Rowe Price. If you have any other pressing questions, requests or concerns please reach out to your Board Representative:
